

FORMA Polycarbonate 16 Aluminium Carports

Designed to the same proven specification as leading European aluminium carport systems.

The FORMA Polycarbonate 16 aluminium carport provides a strong, rigid structure engineered to withstand wind, rain, and temperature fluctuations.

For complete peace of mind, we proudly provide a comprehensive 10-year guarantee across our full range of FORMA aluminium carports — protecting your investment in the years ahead.

Each aluminium carport is manufactured using premium-grade aluminium and high-performance roofing systems, carefully selected for their strength, weather resistance, and longevity.

The FORMA Polycarbonate 16 aluminium carport features a 16mm multiwall polycarbonate roof, providing excellent durability, light transmission, and dependable weather protection for vehicles.

It is an ideal solution for homeowners seeking a modern, low-maintenance carport that offers year-round protection from rain, frost, and harsh sunlight while maintaining a bright and open feel.

Each FORMA Polycarbonate 16 carport is professionally measured, manufactured, and fully installed by our experienced installation teams, ensuring a precise fit, correct structural fixing, and a flawless finished appearance.

The 16mm polycarbonate roof panels help reduce glare and heat build-up while still allowing natural daylight to pass through, keeping the area beneath the carport bright and practical for everyday use.

The most effective way to appreciate the quality, design precision, and craftsmanship of our aluminium carports is by visiting our dedicated showroom in Ripon, North Yorkshire.

Within our showroom, you can explore a wide selection of contemporary aluminium structures up close, allowing you to compare styles, finishes, roof options, and structural details in person.

FORMA Polycarbonate 35 Aluminium Carports

Designed to the same proven specification as leading European aluminium carport systems.

The FORMA Polycarbonate 35 aluminium carport provides an extremely strong, rigid structure engineered to withstand demanding weather conditions, including wind, heavy rain, and temperature fluctuations.

For complete peace of mind, we proudly provide a comprehensive 10-year guarantee across our full range of FORMA aluminium carports — protecting your investment in the years ahead.

Each aluminium carport is manufactured using premium-grade aluminium and high-performance roofing systems, carefully selected for their strength, weather resistance, and longevity.

The FORMA Polycarbonate 35 aluminium carport features a 35mm multiwall polycarbonate roof, providing exceptional strength, insulation, and reliable weather protection for vehicles.

It is an ideal solution for homeowners seeking a robust, premium-quality carport that offers year-round protection from rain, frost, and strong sunlight while maintaining a bright, open feel.

Each FORMA Polycarbonate 35 carport is professionally measured, manufactured, and fully installed by our experienced installation teams, ensuring a precise fit, secure structural fixing, and a flawless finished appearance.

The 35mm polycarbonate roof panels offer increased rigidity and improved thermal performance. They also help reduce glare and heat build-up while still allowing natural daylight to pass through the space beneath the carport.

The most effective way to appreciate the quality, design precision, and craftsmanship of our aluminium carports is by visiting our dedicated showroom in Ripon, North Yorkshire.

Within our showroom, you can explore a wide selection of contemporary aluminium structures up close, allowing you to compare styles, finishes, roof options, and structural details in person.
